Dear Hiring Manager:

Human Resources
Department

I have come across some information online regarding a position that is now available.

Jakarta

I've just finished my study at Bina Sarana Informatika University majored in Information System but also has some relating experience with design from my previous studies as a fashion design student.

As for my experience in web development, I've been working as freelance web development and UI/UX designer. I've done some commissioned designs on e-commerce website, designing UI/UX for a coffee shop, and menu catalog. I also enjoy digital drawing and illustration. In the past, I've worked as a shopkeeper with the owner of the clothing store, learning every chance I get through his expertise. My job desc required me to handle any administrative purposes, for instance, data entry, sales, costumer service and such. My current job required me to be able to adapt to current events and circumstances, making me very agile and creative. I'm also a database system expert as verified by the certificate attached below.

Additional files and my resume are attached. If I can provide you with any further information on my background and qualifications, please let me know. I look forward to hearing from you. Thank you for your consideration.

Best Regards,

Rantansari Putri W.
